

Internal Auditor

A software learning package developed by RMS publishing

BS OHSAS 18001

The **iAS Internal Auditor - BS 18001 Health and Safety e-learning Package** assists delegates in meeting the requirements of the **iAS syllabus** and preparing them for assessment.

It is designed for either the single or multiple user and is divided into individual 'parts' to mirror the **iAS syllabus**. Each part has its own index, which references the syllabus section headings. Users are easily able to move between the different '**Internal Auditor - BS18001 Health and Safety**' parts and sections to access information PDFs, interactive slide presentations and exercises.

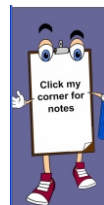

The active time spent in each of the parts is timed by the software. All data entered, together with timings of learning exercises and assessments, is recorded. **In order to record study hours accurately the software monitors when it is actually being used or inactive while taking a break.** There is a motivational reward system to encourage student progress. This rewards users with gold stars for completion of study time and learning exercises for each part.

Learning Exercises: Each Part is supported by a range of learning exercises to check and re-inforce understanding. To gain access to these exercises the user must have spent the recommended learning time studying the material. Users may review their answers and results of the learning exercises for feedback.

- ◆ **Multi-choice**
Selected at random from a bank of questions and each exercise is marked by the software and a result given upon completion.
- ◆ **Written questions**
Selected at random from a bank of questions and the user reviews their answers against the marking scheme to self assign marks.
- ◆ **Sentence builder**
Complete sentences based on the prompts offered within the exercise.
- ◆ **Crossword puzzle**
Enjoyable way to check understanding within a part.
- ◆ **Non-conformity / hazard identification exercises**
Contains additional interactive features, non-conformity / hazard identification exercises including video. The hazard identification exercises require users to interact by identifying on-screen non-conformities / hazards. These are also marked by the software, with results and feedback available.

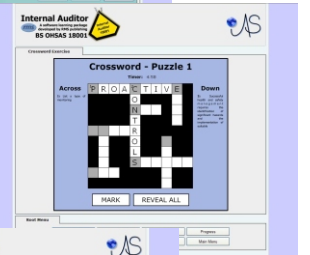

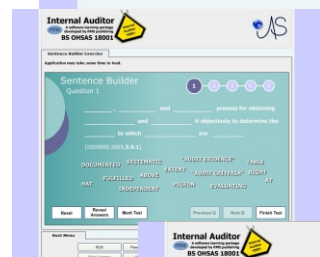

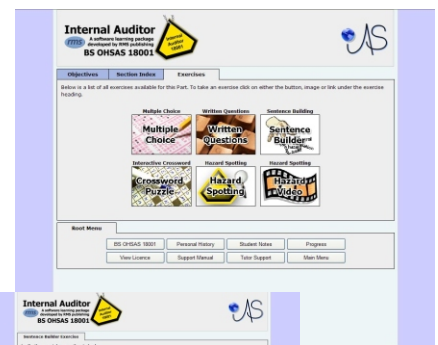

Other Features:

- ◆ BS OHSAS 18001 standard for reference
- ◆ Personal history
- ◆ Learning progress
- ◆ Student notes
- ◆ Tutor support (optional)
- ◆ User guide

Mock and Final Assessment: Upon successful completion of all the parts the assessment section will become available and contains a **Mock Assessment** and **Final Assessment**. The mock assessment is mandatory and allows users to attempt mock assessments under time constraints. The questions are representative of those in the real assessment.

The Final Assessment needs to be successfully completed to gain the **iAS certificate** for this award.

Prices Start From £295 + Annual fee + VAT per licence
