## NATIONAL FIRE CERTIFICATE

---

# ACT, the ultimate provider of NEBOSH qualifications

ACT has provided NEBOSH Certificate training for over 20 years and now offers training at 8 venues across the UK. NEBOSH qualifications are highly regarded throughout the world; many students have attained highly respected careers as a result of completing a NEBOSH qualification.

At ACT, we provide many NEBOSH qualifications from award level to diploma. They cover a range of areas including health and safety and the environment. Specific courses also relate to particular areas such as fire risks and the oil and gas industry.

Classroom based taught courses are available from one of our excellent venues in the UK:

Midlands Oxford London Leeds Manchester Warrington Scotland Bristol Newcastle

## NEBOSH National Fire Certificate

### Classroom taught course

The NEBOSH National Certificate in Fire Safety and Risk Management provides a broad understanding of fire safety issues that affect workplaces and enables fire risks to be managed effectively. As well as covering a range of workplace fire hazards and methods of control, it includes the UK legislation relating to the management of fire safety at work.

Our classroom courses involve face-to-face teaching and provide an opportunity to discuss the topics with other students and the tutor and would suit those that enjoy interaction in a classroom environment. In particular, it has a number of features that may be helpful to those students who have not done formal study and examinations for some time.

**Designed for:** No previous fire safety knowledge is required and it is an excellent course for:

- Managers, supervisors and worker representatives.
- Fire risk assessors in low risk workplaces.
- Those with fire responsibilities at work.
- Manager of buildings or facilities where fire safety is an important issue.
- Those wishing to start a career in fire safety.

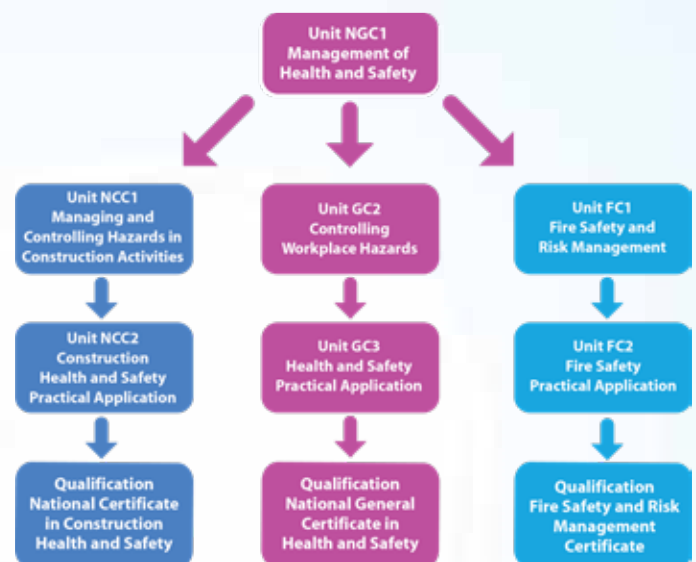

**Outline:** A highly recommended entry level course to the National Diploma qualification. The Certificate in Fire Safety and Risk Management syllabus consists of two units: one focusing on risk management (Unit NGC1) and the other on fire safety (Unit FC1).

### Course content

The NEBOSH National Fire Certificate covers the main legal requirements for fire safety and risk management in the UK, identification and control of workplace fire hazards, and the practical application of this knowledge. This is reflected in the three units that comprise the qualification.

#### Unit NGC1 - Management of Health & Safety

- Foundations in health and safety
- Health and safety management systems - Plan
- Health and safety management systems - Do
- Health and safety management systems - Check
- Health and safety management systems - Act

#### Unit FC1 - Fire Safety and Risk Management

- Managing fire safety
- Principles of fire and explosion
- Causes and prevention of fires
- Fire protection in buildings
- Safety of people in the event of a fire
- Fire safety risk assessment.

#### Unit FC2 - Fire Safety Practical Application

A workplace-based practical assignment that covers the application of understanding related to units NGC1 and FC1.

# NEBOSH National Fire Certificate

## Assessment

The qualification is divided into three assessed units, each of which is assessed separately. Assessment is by two written examinations (one for each of the Units NGC1 and FC1) and a work-based practical examination (Unit FC2). All units must be completed within 5 years to achieve the full NEBOSH National Fire Certificate.

Examinations take place in March, June, September and December. Study programmes are designed to lead towards these dates. Examinations for in-house courses can be arranged with NEBOSH on demand, for a date to suit the learning programme.

## Exam Tutorial/Revision Days

Tutorials are organised prior to each examination period and are an optional extra for all students. They provide an opportunity to revise and consolidate understanding.

The tutorials greatly assist those that need coaching in examination technique and will increase student confidence to complete the written and practical examinations, leading to higher success. Tutorials are open to students attending classroom based courses, e-learning and blended learning.

## Other Methods of Learning

### Blended learning

Blended learning provides the flexibility of e-learning with the interaction and guidance provided by a classroom based taught course. This approach would particularly suit those that want to reduce the amount of time away from work attending a classroom course but retain important face-to-face contact with a tutor. [This course involves a one week study period and the remainder of the study time is done online. ACT offers a number of flexible options for blended learning students.](#)

### In-house

In-house training is where we bring the training to you. The same excellent quality of training that we deliver as a classroom course in our many venues in the UK is available in your premises. In-house training from ACT will allow you to provide cost effective training, delivered at a location and time to suit your needs. Bespoke training programmes can be developed to meet your precise requirements.

Examinations for in-house courses can be arranged with NEBOSH on demand, for a date to suit the learning programme.
