# ACT, the ultimate provider of NEBOSH e-learning NEBOSH Construction Certificate (NC)

As a NEBOSH Gold Learning Partner, ACT offers the very best delivery of course tuition, materials and support with excellent pass rates. We offer a range of NEBOSH online courses for a more flexible approach to training. This allows you to work at your own pace in your own time, and is ideal for those who are self-motivated.

## What is the NEBOSH NC online learning?

This interactive online course provides you with everything you need to pass the NEBOSH Management for

Construction Certificate. When purchasing the construction certificate e-learning you receive everything you need to complete the qualification and is the same content as provided on our classroom course. Therefore completing this course gives you an identical certificate to the classroom course but you'll be learning from the comfort of your own home and at a time that suits you.

The course license, valid for 12 months from date of purchase, provides you with your course materials via our interactive e-learning portal and you study and complete tasks and exercises along the way.

At the start of your study we will agree an exam date along with a suggested study schedule/plan to work to.

Throughout this e-learning you are required to attempt practice study questions in support of your learning and as confirmation of understanding of the topics.

Also available are a selection of exam practice exercises representative of that which you will encounter on your exam by beginning with a realistic scenario to set the scene together with a series of tasks, including a risk assessment, related to the topics covered.

These can be sent to us for review and feedback by an experienced tutor. We have found this to be an invaluable service for our learners as preparation for their open book exam and therefore success in gaining this qualification.

## Key Information

### How long?

NEBOSH recommends a minimum of 116 hours + OBE exam. We suggest that the qualification can be completed in around 4-6 months but is flexible and can be worked around you and your commitments.

### How do I get started?

Once payment has been received, learners will receive an email containing log in details and supporting information for immediate access to the e-learning content.

### Tutor support

ACT's experienced tutors are available throughout your learning to offer unlimited support. They can be contacted via our tutor support messaging system, email, phone or Zoom.

### Technical support

Please contact us and speak to a member of our team if required. You are fully supported for the duration of your license by our Support Team located in the UK.

### Entry requirements

Literate in the English language

## Pricing

Online Package @ £475.00 + VAT per license

*Please note, the course price does not include exam.*

*Discounts are available for those purchasing multiple licences, please contact our sales team to enquire further.*

## Qualification overview

The qualification comprises of the following:

### *Unit NC1: Managing construction safely*

- Element 1 – The foundations of construction health and safety management
- Element 2 – Improving health and safety culture and assessing risk
- Element 3 – Managing change and procedures
- Element 4 – Excavation
- Element 5 – Demolition
- Element 6 – Mobile plant and vehicles
- Element 7 – Working at height
- Element 8 – Musculoskeletal health and load handling
- Element 9 – Work equipment
- Element 10 – Electricity
- Element 11 – Fire
- Element 12 – Chemical and biological agents
- Element 13 – Physical and psychological health

### *Assessment*

NC1: Open book exam, taken online over a 48-hour period.

## Examinations

All construction certificate open book exams are held throughout the year - Jan, Mar, May, Jul, Sep, Nov.

The following fees are applicable when booking with ACT:  
*NEBOSH Fees @ £150 NC1 open book exam [VAT exempt]*  
*Exam Admin Fees @ £80 + VAT*

The exams can be purchased either at the same time as your course or at the time of booking your exam.

## Additional Support

### *Exam tutorial session*

We also offer our learners additional support with services such as an optional exam tutorial day which is organised prior to each examination sitting. As an optional extra for all learners, they provide an opportunity to revise and consolidate understanding.

The tutorial greatly assists those that need coaching in examination technique and will increase learner confidence through tutor and learner interaction, however all necessary information and support is provided within the e-learning.

### *Materials*

Also available is a study book which contains a lot of the same core learning information as the online course but will help you continue your study whilst away from your computer.

*Available @ £39.95 plus post and packing.*

## Other methods of learning

We recognise that everyone is different, which is why we offer a choice of study methods.

Learners can attend a course at our training centre in Dudley or we can deliver the course in your own workplace (cost effective in-house option for multiple learners).

We also offer a virtual classroom option, which combines the interactive and social aspect of classroom teaching with the convenience of learning online. The course is taught live via video conferencing software by an expert tutor, and all the relevant learning materials are sent direct to the learner.

Alternatively we can offer a blended learning option, which provides the flexibility of e-learning with the interaction and guidance provided by a classroom based taught course.

This approach would particularly suit those that want to reduce the amount of time away from work attending a classroom course but retaining important face-to-face contact with a tutor.

*All of our blended learning options can be fully tailored to your needs, please contact us for further information and to discuss the best method to suit you.*

## ACT - Training For Success

Whether it's classroom training, e-learning, virtual classroom or blended learning, ACT has extensive experience and expertise supporting students to succeed in their exams.

We design and deliver a diverse range of health, safety, and environmental training schemes across the globe including the development of e-learning packages and have done for over ten years with thousands of students and businesses choosing us as their training provider.

### *Why choose ACT?*

- 30 years of experience in HSE training
- Experienced tutors to support students
- High pass rates
- Excellent support before, during and after a course
- A range of flexible learning options
